

TFC Service Charges Explained

- We operate a fixed priced repair system, the pricing chart will give you an indication of the repair charge to expect.

- The sum of £48 inc VAT per item is charged at the point of all kit being booked in for service. This is the cost of a 'Basic Service' and covers -

Cleaning (inside and outside)
Thorough visual and physical inspection
Electrical Safety Test (PAT)
Flash Tube and Board alignment
Fuses replenished if necessary
Minor parts replaced (nuts, bolts, washers etc)
Estimate

The Basic Service is a necessary part of the estimate process.

- Once your equipment has been through the 'Basic Service', if a repair is needed the £48 already paid will be knocked off your final repair bill.

- In the rare instance that equipment is deemed 'beyond economical repair' or an estimate is refused you may choose to leave your unit with us for recycling and we will then refund your £48 'Basic Service' charge in the form of TFC shop credit to set against the cost of replacement equipment.

OR

You may choose to have your unit returned with no 'Basic Service' refund.

These terms and conditions supersede any previous terms and conditions issued by The Flash Centre or PSC Ltd and acceptance of goods or services from us will be taken as your acceptance of these.

E&OE

TFC Elinchrom Repair Price Bands

TFC operates a fixed price repair system. The pricing bands below are an indication of the work carried out at each stage.

Compact heads

Basic Service	Fuses, factory reset, calibration, clean, PAT etc
